【教育專業科目】、【學校行政實務與班級經營管理】、【英文科專業能力】 試題

四、 The teaching of the English reading literacy should provide more extensive learning activities for students to make sure they can use English literary knowledge and integrate the life or academic situation. After teaching the following article, you need to design a worksheet. The purpose of the worksheet is to make the students have the ability of arranging their own travel abroad.

Budget airlines are taking off as alternatives to traditional airlines, and they're making air travel around the world affordable. Nevertheless, you need to understand how to fly them first or risk receiving an unexpected hit to your wallet.

Budget airlines offer ticket prices that may seem too good to be true, and often that's because they are. In many cases, those cheap fares are for one-way flights, while return flights are far more expensive. Moreover, you'll have to pay more if you want conveniences such as seat selection, extra legroom, food, and even water.

Clearly, there are things you need to know before booking your tickets. First, there's your luggage restriction. Budget airlines typically charge for checked and sometimes even carry-on bags, and those that are too large or heavy will cost you money. Therefore, always check with the airline's website first. Then measure and weigh your bags so you don't have to pay an additional fee.

The next thing to consider is your stomach. Don't expect any free snacks or meals on your flight, as budget airlines charge for food. So, eat before you go to the airport, and remember to bring some snacks on your flight.

Budget airlines may be more economical, but there are a couple of things about them to take into consideration. First, they use airlines which are designed to hold the most seats possible. This means that you will have very little personal space while flying. Second, they sometimes fly to lesser-known airports instead of the more popular ones. Make sure you know where a flight lands before buying a ticket.

It's also essential that you read the cancellation policy. Most tickets aren't refundable, and changes in reservations cannot be made. Also, when booking, use an email address you check often. Not only will you receive your flight details, but you can also get promotional codes to be used on future flights.

You can also save money by wearing your luggage—literally. You may be charged by weight for your bags, but not the clothes on your back. Therefore, it's smart to wear heavier items and put stuff into your pockets.

Despite these disadvantages, budget airlines do offer cheaper flights than traditional airlines. With careful planning, you can soon be saving money and flying high.
